

WAYS OF THE DREAMERS AND LIGHTING THE EIGHTH FIRE

A Workshop in Santa Fe, New Mexico this April

There's a movement happening within and on Mother Earth. She is heating up in the prophetic understanding which some traditions call Lighting the Eighth Fire. Science calls it climate change. The heat is sourced from Earth's core and expressing through all species that inhabit the Earth. Are you feelin' it?

A Dreamers' Forum is developing for the purposes of discovering, discussing, and practicing the craft sometimes known as the Natural Science of Oral Teachings - a unification of lineages.

Guy Lone Eagle is a philosopher and teacher of the Midiwin Mash Kiki Hey (Ancestral Medicine Ways), and has a Masters degree in Theology with Environmental Emphasis. With skill & integrity, he bridges contemporary western society and the universal intelligence of nature. Lone Eagle educates in a three cornered methodology of science, craft and art. A blessing by Elders continues as long as the education creates a harmonic entry into nature's wisdom.

Explore the prophesy of Lighting the Eighth Fire. Discover the teachings of traditional medicine wheels. Explore how to integrate this wisdom into your daily life as a new way of experiencing this planet, all her species, and ourselves. A transcript (does not include ceremonial techniques) of a previous introduction will be sent upon your word to attend.

You may say I'm a Dreamer.

Well, I'm not the only one.

We hope one day you'll join us.

And the world will live as One. — John Lennon
